## Description

If you have been waiting for the right piece of land in Dacusville, this one is worth a closer look. Approximately 19.5+/- acres on Cribbs Way gives you the rolling hills, mature trees, open areas, privacy, and beautiful Upstate setting that make this part of Pickens County so special. Let's walk the property because this is where you begin to see the possibilities. As the land rolls and changes in elevation, you will find multiple areas that could make beautiful homesites. Imagine positioning your custom home to take advantage of the countryside views, morning light, or an evening sunset. With nearly 20 acres to work with, you have room to think beyond simply building a house. Create a private estate, family compound, or peaceful retreat with plenty of land surrounding you. I love the mixture of open space and mature trees here. There is room for a barn, workshop, detached garage, gardens, trails, or fenced areas for animals. If outdoor recreation is important to you, there is plenty of space to explore, ride four wheelers, enjoy hunting, or simply leave portions of the property natural. Deer are often seen grazing in the fields and wild turkeys make their way through the property, adding to the peaceful country setting. One of the things buyers love about Dacusville is that you can have this kind of privacy without feeling completely removed from everything. You are in the beautiful Upstate South Carolina countryside while still having convenient access to Easley, Pickens, Greenville, shopping, schools, dining, and everyday necessities. Finding approximately 19.5 acres of land for sale in Dacusville SC with this combination of rolling terrain, privacy, open areas, mature trees, views, and homesite potential is becoming harder to do. Whether you have been searching for Pickens County acreage to build a custom home, land for a family compound, recreational or hunting property, or simply a private place where you can spread out and enjoy the outdoors, Cribbs Way gives you the space and flexibility to create something truly your own. Come walk it. Land like this is best appreciated when you can stand on it, look across the property, and start imagining what you could do here.
