Description

Better than new construction and only a few months old! This Upton floor plan has an open main level where the family room, dining area, and kitchen flow together for everyday living and entertaining. A fifth bedroom and full bathroom downstairs provide space for guests, while the two-car garage adds convenience. Upstairs, the primary suite features a private bathroom, alongside three additional bedrooms, a full bath, and a flex room that could be a home office, playroom, or second living area. The owner has already added ceiling fans to every room, so you can move right in and enjoy this nearly new home!
