Description

This is the home you've been waiting for in Rose Hill. From the finished basement apartment and expansive front yard with a long driveway to the wooded backyard views, homes like this don't come along often in this community. You'll notice the charm from the moment you arrive, with its Craftsman-style exterior and inviting rocking-chair front porch. Step inside to a dramatic two-story foyer with views of the upstairs hall. To the right, the beautiful formal dining room features elegant coffered ceilings and wainscoting, while a dedicated office to the left provides a quiet space to work away from the main living areas. Continue down the hall to an expansive open-concept living room and kitchen with plenty of space for a breakfast area. The living room offers flexibility for a variety of furniture configurations and is anchored by a beautiful gas fireplace with a stone hearth. The kitchen features abundant cabinetry, quartz countertops, a large center island and a walk-in pantry for additional storage. Glass doors lead to the screened porch overlooking a protected forest, creating a peaceful view you'll be able to enjoy for years to come. A separate grilling deck adds even more outdoor living space. Designed with entertaining in mind, the kitchen, living area, dining room and screened porch flow seamlessly together. On the opposite side of the main level, you'll find a bedroom and full bath; the current owners are using this bedroom as an additional home office. Upstairs, the spacious primary suite includes a generous sitting area that's perfect for a reading or TV nook, workout area or additional office space. The primary bath features dual vanities, a separate shower and garden tub, and its generous footprint offers plenty of possibilities for future updates. The walk-in closet is enormous. Three additional bedrooms and another full bath are also located on this level, along with a large family room that would make an ideal media room, game room or flexible second living space. The current owners didn't simply finish the basement—they created an apartment-style living space with its own separate entrance. As you enter, you'll first find two large storage areas before reaching the basement living room. To the left is a kitchen area with a sink, refrigerator and cooktop; the only thing missing is an oven, which could easily be added. To the right of the living room is a bedroom area. The owners preferred a more open, studio-style layout, but a door could easily be added to create additional separation. A large adjoining hall is currently used as closet space, with the potential to create direct access from the bedroom. There's also an additional 11' x 17' room currently used as an art studio that offers tremendous flexibility for whatever suits your needs. One of the coolest features of the basement is the stained concrete flooring. A mini-split system currently provides climate control for approximately 900 square feet of the living area and could potentially be expanded if desired. There is so much to appreciate about this home that it's difficult to fit it all into one description. With an abundance of living space, one of the most appealing lots in the neighborhood, Powdersville schools and convenient access to Easley, Powdersville and downtown Greenville, this home offers a combination of space, flexibility, location and setting that is hard to find.
